

Trough Feeder

Trough Feeder

Brief Introduction

The trough feeder used for feed massive material to receiving machinery from hopper, it is widely used to feed large size material (undressed ore and so on) into primary crusher of metallurgy, mine, chemical industry, building, dressing, coal ,and so on.

Main Technical Parameters

Model	Entrance size (mm)	Exit size (mm)	Swinging (mm)	Swinging frequency (mm)	Max feeding particle size (mm)	Capacity (t/h)	Motor (kw)	Weight (kg)
400*400	400*400	400*400	12	18.2	100	25-30	2.2	535
600*500	600*500	600*500	10-50	38.9	200	10-50	4	1054
980*1240	980*1240	900*800	20-50	23.7	350	36-90	7.5	1676
